

OBJECTIVE:

GIS and spatial data analyst with a background in urban planning, transportation, and demographic research. I'm interested in what large geospatial and market datasets reveal about how people live and move by translating raw location and demographic data into map analysis.

EDUCATION:

University of Pennsylvania	August 2026 - May 2027
Master of Science, Urban Spatial Analytics Weitzman School of Design	
University of Southern California	November 2024 - May 2026
Master of Science, Emerging Transportation Systems Viterbi School of Engineering, Concurrent Enrollment in Undergraduate Degree GPA: 3.97/4.0	
University of Southern California	January 2022 - May 2025
Bachelor of Science, major in Urban Studies and Planning Honor(s): Summa cum Laude GPA: 3.93/4.0	

HONORS:

2026 Storymap Best in Show Award Winner, *hosted by the Southern California Association of Governments (SCAG)*
Awarded Best in Show for ArcGIS Storymap project, presenting research to elected officials, industry leaders, and planning practitioners at the 2026 SCAG Regional Conference and General Assembly in Palm Desert, CA.
Storymap: <https://arcg.is/09P5X11>

SKILLS:

Data Analysis	Python, STATA, Excel
Design Software	AutoCAD, PTV Vissim and Line, Bentley Systems OpenRoad and OpenRail, Adobe Office Suite
GIS & Mapping	Esri ArcGIS Pro, QGIS, ArcGIS Online, ArcGIS StoryMaps

INDUSTRY & RESEARCH EXPERIENCE:

Healthy Ageing and Urban Spaces (HAUS) Study , GIS Research Assistant (Volunteer)	February 2026 - Present
- Conducted spatial analysis of built environment indicators for 1,488 participant neighborhoods in Melbourne and Hong Kong. - Utilized QGIS and Python to process and calculate 10+ built environment indicators including socioeconomic status, population density, greenspace, bluespace, and points of interest density. - Managed and cleaned large-scale geospatial datasets from multiple sources including ABS Census 2021, PSMA, Google POI, NHSD, and Victorian Government spatial data. - Developed area-weighted spatial calculation methodology across three buffer types and performed data quality control including geometry fixing, CRS standardization, and deduplication across multiple sources.	
Willowbrook Environmental Research & Community Workshop , Student Researcher	November 2025 - April 2026
- Reviewed lawsuits, technical reports, and contamination records related to the Athens Tank Farm and Ujima Village affordable housing development in Los Angeles. - Built an ArcGIS Storymap documenting the environmental history of the site, and led a community workshop for Compton and Willowbrook middle and high school students. <i>USC Spatial Analysis Lab in collaboration with LA Commons.</i>	
Urban Data Lab at University of Southern California , Research Assistant (Volunteer)	August 2025 - December 2025
Coded with Python and APIs for statistical and narrative reports on dwell time in public green spaces using U.S. Census Bureau demographic data and Advan Research datasets. <i>Mentor: Geoff Boeing, Ph.D</i>	
California Department of Transportation , Student Transportation Planning Assistant (Part-Time)	October 2022 - May 2025
- Utilized ArcGIS Pro and ArcMap for processing data and developing maps for federal funding project grant applications. - Synthesized engineers' comments for local development review (LDR) transportation impact assessments, checking for consistency with the state's requirements and recommendations pursuant to California Environmental Quality Act. - Drafted reports with departmental review of FY 25-26 Sustainable Communities grants, Complete Streets Advisory Committee, and smart growth/livable communities' activities.	
Southern California Association of Governments , Integrated Planning & Programming Intern (Part-Time)	October 2023 - June 2024
- Monitored budget compliance and fund utilization timelines for a multi-county portfolio of infrastructure projects against federal funding deadlines, flagging at-risk projects for corrective action. - Conducted quantitative screening of project funding applications across three competitive grant programs, evaluating proposals against prioritization criteria to support award decisions. - Analyzed program performance data to support planning for subsequent regional grant cycles, and coordinated with partner agency staff.
